Multi-Activities – Facilities covered by two or more of the other regulated site features.

Superfund – Facilities designated by EPA to respond to concerns over health and environmental risks posed by hazardous waste.

Toxic Releases – Specific facilities regulated by EPA that must report to state and local governments the locations and quantities of any chemical stored on site.

Water Discharge – Specific facilities that are regulated by EPA to discharge to US waters.

Air Emissions – Specific facilities regulated by EPA that release pollutants into the air.

BRS (Biennial Reporting System) – Specific facilities regulated by EPA that collect data on the generation, management, and minimization of hazardous waste.

Hazardous Waste – Specific facilities regulated by EPA that handle materials designated as hazardous waste.

Working Locally

What Is Being Done About My Environment?

The answer to this question is provided by various sources. Your government is working together with others to combine environmental and public health information and display it by common geography and topic.

Thousands of people are working to protect and restore their environment. Use the sources of information below to find out more about groups working in your community and how you can participate. Become familiar with environmental issues and potential environmental and human health risks caused by pollution. Learn how you, your family, and your community can [protect the environment](#).

FEDERAL SOURCES

EPA maintains the [Adopt Your Watershed](#) database, a nationwide list of 4,846 groups that you might want to join, working to protect and restore our valuable rivers, streams, wetlands, lakes, ground water, and estuaries. Check out the list for your area. Learn about the [Fifteen Things You can Do to Make a Difference in Your Watershed](#).
